## Skills

**Technical skills:** HTML, CSS, JavaScript, TypeScript, React, Redux (Toolkit), Node.js, Next.js, Express, Nest.js, PostgreSQL, Prisma, Sequelize, Git, GitHub Actions, Jira, DigitalOcean, Google Cloud, Heroku, Netlify, Vercel.

## Experience

### **GetMobile Technologies**, Lagos. – Frontend Developer (August 2021 - Present)

- I develop and actively maintain three web projects using modern front-end technologies.
- I work closely with the backend team to streamline the development process and reduce the feedback loop among developers by 60%.
- I set up GitHub Actions for automated server deployments, reducing developer deployment time by 5 to 8 minutes per deployment.
- I collaborate with the team and stakeholders to deliver projects within four months.

### **MedCob**, Lagos — Frontend Developer (February 2022 - August 2022)

- I refactored the codebase from CRA of 200+ pages to NextJS which improved the website's SEO rating and reduced the website's page load times by up to 6 seconds.
- I developed five dashboards for different types of users and the super admin.
- I worked with the backend team to add functionality to the dashboards.

### **MaterialsPro**, Lagos — Frontend Developer (September 2021 - February 2022)

- I coded a reusable dashboard template for the builders, suppliers, admin and logistics. This saved about four developer hours when setting up these projects.
- I worked with the backend team to ensure we fulfilled the project requirements within six months.
- I collaborated with another front-end developer to add domain-specific functionalities to the dashboard.

### **Ribbon Blockchain**, Johannesburg — Frontend Developer (March 2021 - September 2021)

- I set up the landing page and dashboards projects.
- I split tasks with the other front-end developer bringing the number of git merge conflicts from an average of 5 per week to zero.
- We created dashboards for users and health practitioners to complete tasks and record interactions and health information.
- Integrated the backend APIs

### **MIL Technologies**, Lagos — Frontend Developer (intern) (October 2020 - March 2021)

### **WeJapa**, Lagos — Frontend Developer (intern) (August 2020 - October 2020)

# Education and Certifications

**Neo4j**, Building Neo4j Applications with Node.js (April 2022)

**Olabisi Onabanjo University**, B. Engr in Electrical and Electronics Engineering. (December 2021)

**Google Africa Developer Scholarship (GADS)**, Certificate of Course Completion (Mobile Web Specialist) 2021.

**Codility**, Silver Award The OLX Group challenge. (November 2020)

## Projects

### **Imperium Energy (By Sterling)**

This is a revamp of Sterling's imperium energy platform to a more responsive, user-friendly website. We also increased the overall performance by over 100% measured using tools like website.grader.com and Google's page speed insight.

### **Goloka**

Goloka is a survey platform that enables companies and individuals to get responses to questionnaires through field agents.

### **MedCob**

Medcob provides an accurate, dynamic and interactive directory of Health facilities and providers in Nigeria.
